REASONS FOR ALLOWANCE

1. Claims 1-18 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

Regarding Claim 1, the invention as claimed, specifically in combination with a first conductivity first non-single crystalline semiconductor layer, a second conductivity second non-single crystalline semiconductor layer, a substantially intrinsic third non-single crystalline semiconductor layer between the first and second semiconductor layers, wherein many of crystal grains contained in the third semiconductor layer have major axes substantially perpendicular to said main surface of the substrate on an interfacial portion between the third semiconductor layer and the first and/or second semiconductor layer, with many of crystal grains contained in either the first or second semiconductor layer having major axes substantially parallel to the main surface of the substrate on the interfacial portion, is not disclosed or made obvious by the prior art of record.

Regarding Claim 9, the invention as claimed, specifically in combination with a first conductivity first non-single crystalline semiconductor layer, a second conductivity second non-single crystalline semiconductor layer, a substantially intrinsic third non-single crystalline semiconductor layer between the first and second layers, with the first and/or second semiconductor layers having a structure formed by stacking a first layer and a second layer with many of crystal grains in the first layer having major axes substantially parallel to the main surface of the substrate and many of crystal grains in the second layer having major axes
